**WinDForce supervises commissioning of 1.1 Gigawatts of wind power projects in 2015**

WinDForce Management Services Pvt. Ltd. (WinDForce), a leading wind energy consulting firm from India, has announced that its association with windfarm implementation in the financial year ending March 2015 exceeded 1 Gigawatt (1000 MW). During the year 2014-15, a total installed capacity of 2,300 MW was installed and commissioned in India. Out of this, WinDForce was involved in supervision and commissioning of 540 MW and its total involvement including ongoing projects has been 1.17 GW. This corresponds to nearly 25% of the projects commissioned all over India.

The company has been acting as Owner's Engineer or Lender's Engineer in these projects. In the year 2014-15, WinDForce provided its supervision services to key players in the Indian market on different project sizes. Some of the prominent projects include 200 MW for Renew Power in Maharashtra, 100 MW for Energon in Andhra Pradesh, 102.8 MW for ONGC in Rajasthan, 102.8 MW for CLP in Rajasthan, 47.6 MW for NALCO in Rajasthan, 30 MW for Renew Power in Rajasthan, 10.5 MW for Sterling Agro in Madhya Pradesh, etc. Out of

these projects, nearly 0.54 GW of projects were commissioned in this financial cycle, while a few are still in pipeline for commissioning in the next financial year. The services provided by WinDForce include the review of contracts, supervision and monitoring in implementation, managing project schedule, verification of equipments and complete project management, etc.

**Dr Jami Hossain, Chief Mentor and Co-Founder,** said *“Thus we have played the most crucial role in implementation of windfarms as Owner's or Lender's Engineers ensuring quality of engineering work implemented.”* He added, *“Wind turbines are heavy dynamic machines and require great deal of care in handling and setting up of the projects.”*
